Available for UK, EU, and GCC working hours

SUMMARY

Ad platforms, GA4, and sales data rarely agree. I reconcile them and show what is driving revenue and where budget should move. 5+ years in paid media and e-commerce analytics, using SQL, Python, and BigQuery to turn ad, web, and order data into measurement teams use for budget decisions.

CORE SKILLS

Analytics: CAC, CPA, MER, ROAS/ACoS, contribution margin, funnel and cohort analysis, regression, KPI reporting

Measurement: GA4 and GTM audits, Consent Mode, multi-touch attribution, A/B and geo tests, incrementality, platform vs GA4 vs order reconciliation

Languages & Data: SQL (CTEs, window functions), Python (pandas, NumPy, SciPy, statsmodels), BigQuery, dbt, Advanced Excel, Git

BI & Platforms: Power BI, Tableau, Looker Studio, Google Ads (API), Meta Ads, Amazon Ads, Shopify

PROFESSIONAL EXPERIENCE

Marketing Data Analyst | Extrashade (USA), Remote Oct 2021 – Present

- Built a GA4 and BigQuery pipeline for 30+ campaigns, replacing manual reports with live dashboards and cutting weekly reporting time by about 40%.
- Reconciled platform-reported conversions against GA4 and order data so budget decisions rested on consistent numbers.
- Designed Python A/B testing frameworks (significance, power analysis); contributed to an 18% higher conversion rate and 15% lower CAC over two quarters.
- Used regression and cohort analysis to find $50K+ in wasted annual spend; reallocating it raised campaign profitability by about 25%.

Freelance Marketing Data Analyst & Consultant | Self-Employed Oct 2020 – Present

- Delivered 20+ Power BI and Tableau dashboards for US e-commerce clients covering campaign performance, LTV, and attribution.
- Analysed Amazon Ads and Google Ads campaign, keyword, and ASIN-level efficiency (ACoS, ROAS) to find wasted spend and guide budget changes.
- Audited GA4 and GTM tracking and planned BigQuery warehouses for clients moving off Universal Analytics.
- Automated recurring reports with Python and SQL, cutting turnaround from 3 days to 2 hours and adding basic anomaly detection.

PPC Manager | THATLifestyleNinja (USA), Remote Oct 2020 – Aug 2021

- Managed and optimized paid search across 15+ campaigns, tracking CTR, CPC, and ROAS in Excel and Google Sheets dashboards; optimizations improved ROI by about 25%.

SELECTED PROJECTS

Paid Media Budget Reallocation | *BigQuery, Power BI, GA4* github.com/adnan3624

- Found $372,878 in underperforming spend across Google Ads, Meta, and TikTok in 6 countries; modeled a 25% budget shift projecting $1.9M extra revenue at flat spend.

Multi-Touch Attribution | *BigQuery, Looker Studio* github.com/adnan3624

- Compared Last-Click, Linear, and Position-Based models on 10,000 touchpoints; showed last-click undervalues Display, Referral, and Social.

A/B Test Significance Analysis | *Python, SciPy, statsmodels* github.com/adnan3624

- Checked sample ratio mismatch, then confirmed a 43.09% conversion lift with a two-proportion Z-test ($p < 0.0001$) using a PSA control group.

EDUCATION & CERTIFICATIONS

BS Mathematics, University of Sargodha 2016 – 2020

Google Advanced Data Analytics | Google Data Analytics Professional | Google AI Essentials (2024)
